Directions for use: MetaGrow™ SB FOLIAR is a wettable powder and can be applied as a foliar spray, in transplant water and in pre-plant treatments. SB FOLIAR will pass a 100 mesh filter (149 micron) so check for application method compatibility. Use rates will vary from 0.1 lb per acre up to 10 lbs per acre, depending on crop, the number of applications, and application timing. Do not apply more than 3lb per acre in any one foliar application. For foliar spray applications, dilute the SB FOLIAR with 10 gallons of water (or more) for each lb of SB FOLIAR. For foliar applications, apply when canopy temperatures are below 90°F. To prevent excessive foaming during tank mixing, fill tank 1/2 to 3/4 full before adding SB FOLIAR and avoid splashing of water during filling.

NOT FOR USE IN ORGANIC CROP OR ORGANIC FOOD PRODUCTION
